

Policy Name:	AAT Deficiency	Policy #:	2383P
---------------------	-----------------------	------------------	--------------

Purpose of the Policy

The purpose of this policy is to establish the criteria for coverage of Aralast NP, Glassia, Prolastin-C and Zemaira.

Statement of the Policy

Health Alliance Medical Plans and Health Alliance Northwest will approve the use of Aralast NP, Glassia, Prolastin-C or Zemaira under the Specialty Medical benefit when ALL of the following criteria have been

Criteria

1. Coverage Criteria

- 1.1 Member has an alpha-1 antitrypsin (AAT) blood level less than 80 mg/dL or less than 11 uM/L.
 - This is considered the blood level of the enzyme that protects against emphysema
- 1.2 Member has a genetic type associated with AAT deficiency or serum AAT concentrations of less than 80mg/dL.
- 1.3 Post-bronchodilation FEV1 (forced expiratory volume in one second) of 30% to 65%, OR a rapid decline in lung function
- 1.4 Ordered by a Pulmonologist (lung doctor)
- 1.5 Member is a non-smoker, meaning no nicotine products for at least 6 months

2. Exclusions

- 2.1 Member is IgA deficient with antibodies to IgA
- 2.2 Member has chronic obstructive pulmonary disease (COPD) and a genotype of PiMZ
 - The COPD Foundation has found no evidence that alpha-1 antitrypsin augmentation is effective in this population

3. Approval Period

- 3.1 Initial Approval: 12 months
- 3.2 Subsequent Approvals: 12 months with documentation that deterioration of lung function has slowed substantially.

CPT Codes

82103 – 82104	Alpha-1-antitrypsin; total phenotype
---------------	--------------------------------------

HCPCS Codes

J0256	Injection, alpha 1 - proteinase inhibitor - (human), not otherwise specified, 10 mg
J0257	Injection, alpha 1 proteinase inhibitor - (human), (Glassia), 10 mg
